

### Goal:

To generate higher competitiveness in companies seeking Carbon Neutrality, through capacity building in the sector of Small and Medium Businesses (PYMES) for the management of their inventory of greenhouse gases.

### Partners:

ALIARSE, BAC|Credomatic, Chamber of Industry, Ministry of the Environment and Energy (MINAE), Ministry of Economy, Industry and Trade (MEIC), INTECO, and the United Nations Development Program (UNDP).

### Lines of work

- Develop and strengthen the capacities of the PYMES sector to **manage its inventory of greenhouse gases and have access to the C-Neutral brand**.
- Promote an **exchange of experiences** between organizations committed to the country's goal of becoming a low carbon economy.
- Generate increased **recognition of C-Neutral Brand** in Costa Ricans.

### Results to date:

- More than **134 organizations trained** to use the World Resources Institute Protocol for Greenhouse Gases.
- **+ 100 PYMES** participated in the online course "PYMES towards Carbon Neutrality" offered by the Partnership.
- **+ 1,020,000 people with increased awareness** due to massive communication campaigns.

### Impact indicators:

- **Increase by 50% of the number of PYMES** trained in Carbon Neutrality.
- **Increase by 10% of the number of organizations checking their inventories** of Greenhouse Gases.
- Creation of a **Carbon-Neutral business table** to promote the Country Program.
